NOTES:

1. The above doors come with Astragals, Sight Guards, Retainers and Guides (when/if they apply to the door style)
2. Understand that panel width for a typical opening size may vary by manufacturer. However, UNITEC's standard panel widths may very well fit and function perfectly fine, even with a slightly smaller existing panel width
3. Be sure your return has space for the panel selected, or stop bumpers can be adjusted to accommodate the slightly wider standard width panel. (eg. a 22-1/8" wide panel for 42" c/o will almost universally fit and work For a former panel measuring 21-3/4" wide)
