

# EC2-7 Escalator Machine

## Escalator Machine Retrofit Solution

At UNITEC, service excellence describes how we do business.

As part of our commitment to provide ongoing support to our installation base, UNITEC is pleased to introduce a machine retrofit solution for Model 506 and 506SL escalators.

Proactively planning for a potential shutdown is critical for your business. In cases where Model 506 and 506SL machines are close to reaching their intended lifecycles, UNITEC now offers the EC2-7 escalator, a complete machine replacement with enhanced components.

### EC2-7 Major Upgrades Features and Benefits

- Mechanical interface parts including a bedplate adapter and maindrive chain.
- Machine assembly including the motor, brake, gearbox, output sprocket, overspeed, and brake function sensors.
- Electrical interface kit which includes an overspeed sensor monitoring relay, new reversal detection device, and any required additional power supply transformers.
- Up-to-date electronic overspeed and non-reversal devices built into the system, plus additional safety features.
